

MSc Software Project Management – IC565

1. Introduction

The MSc Software Project Management programme will provide graduates from IT and related fields with the necessary skills to lead and manage software development projects. This programme is a response to the increasing need for leaders who can manage people and processes, who communicate well and who are knowledgeable about the current software development practices in the software industry.

2. Aims

This programme :

- Provide advance knowledge, understanding and skills in professional practice in IT and management of software systems,
- Provide practical experience of software projects from the initial analysis of a problem, through design, planning and testing in order to prepare for effective participation in the software industry,
- Prepare candidates for an effective career with the potential to reach a leadership role with competencies in software project management.

3. General Entry Requirements

Successful completion of an undergraduate degree with at least a Second Class or 50%, whichever is applicable, or a GPA not less than 2.5 out of 4 or equivalent, from a recognised Higher Education Institution, or alternative qualifications acceptable to the University of Mauritius.
