

VACANCY

MAURITIUS OFFICE

Belief comes first.

Junior BI Developer

Reporting to the Head, IT Data & Analytics, the job incumbent will be engaged in the design, development, enhancement, and maintenance of all data related solutions within the group. The role is essential to the Group to provide consistent and quality analytics, including operational and regulatory reporting.

Duties & Responsibilities:

- Responsible for gathering business requirements;
- Responsible to design, develop and maintain reports and queries from Data Store & Data Warehouse;
- Create and maintain project documentation and manuals;
- Responsible to troubleshoot existing report issues and resolving any data quality issues; and
- Perform any other duties as may be required.

What are we looking for :

- An undergraduate degree or equivalent preferably in the fields of Information Systems, Information Technology and Computer Science
- Sound knowledge and experience on SQL and PL/SQL
- Knowledge of Tableau or any other visualization tool will constitute an added advantage
- Good analysis, coding, testing and documentation abilities
- Good communication skills
- Good problem solving and analytical skills and attention to detail
- Ability to work both independently and as part of a team
