

Integuru is hiring a Software Engineer!

We are Integuru—a software company that develops integrations for websites lacking official APIs by reverse engineering their internal systems. We then host these tailor-made integrations for our clients. Proudly backed by Y Combinator and well-funded, we are a small yet agile team that moves quickly to deliver innovative solutions.

Situated at **San Francisco, United States of America.** (Note: this role is full remote)

Duties are as follows:

- Creating and maintaining integrations with platforms through reverse engineering their internal APIs.
- Writing clean code in Python
- Communicating with clients on deliverables
- Shipping high quality features to production while meeting deadlines

We are currently looking for degree holders in Computer Science, Applied Computing, Information Systems. (We will hire any major as long as you can code well!)

Duration: Contractual Period of 3 months. If all goes well, we would love to hire you full-time.

Experience: 0-1 years

Remuneration: \$700-\$1000 USD per month.

Working Days/ Time: 8 hours per day on weekdays. No strict hours. Sometimes need to work weekends.

Send your CV/ Motivation Letter on: alan@taiki.online (This is completely optional!)

By: **Mar 21, 2025**

Note: We strongly prefer alumni/new grad as we are looking for a full-time contractor that can convert to full-time. Also the sooner you can start the better!
