

Accenture Services Ltd is hiring a Engineering Services Associate/Analyst!

Accenture is a global professional services company with leading capabilities in digital, cloud, and security. Combining unmatched experience and specialized skills across more than 40 industries, we offer Strategy and Consulting, Interactive, Technology and Operations services—all powered by the world's largest network of Advanced Technology and Intelligent Operations centers. Our 699,000 people deliver on the promise of technology and human ingenuity every day, serving clients in over 120 countries.

Situated at: 3rd Floor, 1 Cybercity Building, Wall Street, Ebene

Duties are as follows:

- **Tool Configuration:** Support the setup, maintenance, and deployment of specialized engineering tools and software.
- **Process Alignment:** Translate technical manufacturing requirements into functional tool settings.
- **Technical Support:** Troubleshoot tool-related issues for the engineering team and ensure system data integrity.

Qualifications & Skills

Educational Background:

- **Engineering:** Degree in Aerospace, Mechanical, Industrial, or Manufacturing Engineering.
- **IT & Systems:** Degree in Information Systems, Computer Science, or Business Informatics.
- **Business & Management:** Degree in Project Management, Supply Chain, or Quality Management.

Technical Toolkit:

- **Proficiency:** MS Office (Excel/PowerPoint) and Google Workspace (Sheets/Slides).
- **Programming & Automation (Highly Desired):** Experience with SQL, Python, VBA, AppScript, or TypeScript to automate repetitive tasks.
- **Business Intelligence:** Exposure to Power BI, QlikSense, or Looker Studio.
- **Systems:** Familiarity with ERP systems (SAP preferred) or MS Access for database management.

Languages & Soft Skills:

- Bilingual: Professional fluency in English and French (written and verbal).
- Adaptability: Ability to pivot tasks week-to-week based on shifting project priorities.
- Precision: High attention to detail with a focus on accuracy in reporting.

Nice to Have:

- Knowledge of ERP systems (preferably SAP)
- Previous experience in engineering, manufacturing, or quality projects.
- Experience in data analysis (Looker studio / Power BI / Excel VBA / Others)

Duration: Full time

Remuneration: Salary Scale + Benefits

Work Schedule: Morning shift (8:00 AM - 5:00 PM) OR CET Shift (10:30 AM – 7:00 PM /11:30 AM - 8:00 PM)
