

# Diploma /BSc (Hons) Occupational Health and Safety - SCLM438

## 1. Introduction

With the introduction of new technologies, equipment and work patterns, concern for the promotion of health and safety in the workplace is increasing among workers and employees across all industries and in society, in general. Consequently, the need for occupational health and safety professionals is also increasing. In this context, this new modular programme in Occupational Health and Safety, which is a collaborative endeavour with the Faculty of Science offers a progression through Diploma (60 credits) to a BSc (Hons) Degree (105 credits).

The programme is designed to benefit both Occupational and Health Officers who wish to develop and update their skills and those with a general interest in understanding the technical and managerial skills to address the occupational health and safety issues of modern society.

## 2. Objectives

The primary objective of the programme is to prepare and provide professional training to practicing and potential health and safety officers, so that they can develop their knowledge and skills in:

- i. Identifying, understanding and appreciating occupational hazards (actual and potential) and the taking of appropriate measures for their prevention and control;
- ii. Analysing, investigating, reporting and prevention of accidents and associated problems in the workplace;
- iii. Advising about the requirements in promoting a safe and healthy working environment; and
- iv. Applying the provisions of the occupational safety, health and welfare legislation to ensure their compliance.

## 3. Programme Requirements
